Patent Application No.: Japanese Patent Application No. 2002-040198

Examiner's Notice Date: October 27, 2004

Examiner: A. Nomura

This application is rejected on the grounds stated below. Any opinion about the rejection must be filed within 60 DAYS of the mailing date hereof.

REASONS

The inventions recited in the following claims are unpatentable under section 29^{bis} of the Patent Law on the grounds that the invention is considered the same as the invention described in the specification and the drawings originally attached to the request of the following application, which was filed before, and disclosed after, the filing date of this application and that the inventor of the present application is not considered to be the inventor of the cited application, and at the time of the filing of this application, the applicant is not considered to be the applicant of the cited application.

REMARKS

Claims: 1-3

Prior Application: 1

Note:

When the present invention is compared with the invention of the prior application (see paragraph [0083]), "VOBS", "Cell", and "the start VOB number in VOBS and the end VOB number in VOBS" respectively correspond to "the video object", "the cell" and "the static image numbers of the playback start and end in the cell". Thus, there is no structural difference between the present invention and the invention of the prior application.

If a new reason for rejection is noticed, a further Official Action will be

issued.
